JAGUAR I-PACE

Every Jaguar feels like no other car on the road. Moving to all-electric power doesn't change this. It offers even more opportunities to shape the dynamic performance and dramatic design for which we're renowned. Jaguar I-PACE is a pure battery electric vehicle (BEV) built from the ground up to embrace these new possibilities.

Radical design conceals an exquisite interior with SUV levels of practicality. A sophisticated, all-electric powertrain provides high performance with zero tailpipe emissions. Its cutting-edge technologies work seamlessly with the car and with you. Thrilling to look at and drive, easy to live with, and connected like never before – I-PACE is the world's smartest five-seater sports car.

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	PRACTICALITY	

THE ELECTRIC BENEFITS OF I-PACE

"We've created I-PACE to represent the next generation of battery electric vehicle design. It's radical, dramatic, and future-facing – the product of authentic Jaguar DNA matched with beautiful, premium details and British craftsmanship."

Director of Design, Jaguar

ELECTRIFYING PERFORMANCE

I-PACE's linear acceleration is instantaneous, with no lag and no gearshift interruptions. Its 294kW of peak power takes you from 0-100km/h in only 4.8 seconds. For sports car agility, the 90kWh battery is positioned within the floor, between the axles, giving a low centre of gravity and near perfect weight distribution. See page 15 for details.

QUIET REFINEMENT

Electric power is naturally quiet, but we've still gone to great lengths to make I-PACE an oasis of calm. Sophisticated motor encapsulation dampens sound while I-PACE's radical design has been engineered to minimise wind noise. The intrusion of exterior noise is further reduced by acoustic lamination on the front windows. See page 13 for details.

PEACE OF MIND

For added peace of mind, I-PACE's 90kWh battery is covered by a comprehensive eight year warranty¹ in addition to your standard Jaguar warranty. What's more, you'll always have the full support of our established Jaguar Retailer network and highlytrained technicians who know your Jaguar inside and out. See page 51 for details.

CLEVER USE OF SPACE

I-PACE uses axle-mounted electric motors and concentric single-speed transmissions. This creates considerable room within the cabin, giving I-PACE a compact footprint from the outside but space within. See page 12 for details.

EASE OF USE

Clean, convenient, hassle-free – that's the future of car ownership. Visits to the fuel station will be a thing of the past – I-PACE's battery can be charged from a conventional socket, a wall box or at a public charging station. So instead of taking time out to recharge, you simply get on with the things you want to do. See page 16 for details.

LOW COST OF OWNERSHIP

Owning I-PACE means that you may be eligible to benefit from incentives such as lower road taxes, reduced city centre tolls, and even gaining access to reduced congestion lanes². Additionally, I-PACE's fewer moving parts can help to reduce servicing and maintenance costs.

RANGE

A single full charge provides a range of up to 470km³ on the WLTP cycle – more than enough to cover the average weekly commute of 300km⁴. See page 16 for details.

¹I-PACE's 90kWh battery warranty is limited to eight years or 160,000km (whichever comes first). It is redeemable in the case of any manufacturing defect or should a certified Jaguar Retailer measure that the battery has dropped below a 70 percent State of Health. ²Market dependent. Please contact your local Jaguar Retailer for more information. ³The figures provided are as a result of official manufacturer's tests in accordance with EU legislation. For comparison purposes only. Real-world figures may differ. CO₂ and fuel economy figures may vary according to factors such as driving styles, environmental conditions, load, wheel fitment and accessories fitted. ⁴This figure has been obtained from the 'Driving and Parking Patterns of European Car Drivers' mobility survey, conducted by the European Commission.

EV range figures are based upon production vehicle over a standardised route. Range achieved will vary dependent on vehicle and battery condition, actual route and environment and driving style.

BUILD YOUR OWN

ON-BOARD CHARGER

Electricity can be supplied to the car in AC or DC format. To charge the car, I-PACE's 11kW 3-phase on-board charger converts the electricity to DC.

BATTERY

I-PACE's 90kWh battery replaces the fuel tank. Its high energy density lithium-ion pouch cells store the car's energy.

> I-PACE's inverter takes the direct current (DC) stored in the battery pack and turns it into the alternating

current (AC) that feeds the motor.

FRONT AND REAR MOTORS

Instead of an engine to drive the front and rear wheels, I-PACE has two efficient and compact Permanent Magnet Synchronous Electric Motors. Independently, each motor can deliver 147kW and torque of 348Nm – a total output of 294kW and 696Nm. As well as high-performance All Wheel Drive (AWD).

INVERTER

CHARGING SOCKET

A charge point replaces the fuel filler. Just plug in and charge.

INTRODUCTION 05

INTRODUCTION	DESIGN	PERFORMANCE	

INTRODUCING JAGUAR I-PACE

JAGUAR DYNAMICS

I-PACE's driving experience reflects its dynamic design. Using the proven Jaguar setup of a double wishbone suspension at the front and Integral Link suspension at the rear, this is a true driver's car. Engaging and rewarding handling is balanced with exceptional ride comfort and refinement. See page 15 for details.

ELECTRIC POWERTRAIN

Jaguar's I-TYPE Formula E racing car and I-PACE both use Permanent Magnet Synchronous Electric Motors and lithium-ion pouch battery cell technology. These motors are small, compact and efficient, which helps to optimise performance and range. See page 16 for details.

ALWAYS CONNECTED

I-PACE's InControl technologies seamlessly connect you to your car and the outside world. There's Pivi Pro with Smart Settings to learn your preferences, the All-new Navigation System¹ which displays such features as charging stations and parking spaces. Apple CarPlay^{®2} and Android Auto^{™3} make it easy to use selective apps on the Touchscreen, whilst the Jaguar Remote⁴ app lets you securely interact with your car from your smartphone. See pages 20-23 for details.

INTEGRATED TECHNOLOGY

At the heart of I-PACE is a 'floating' centre console, containing our latest infotainment system, Pivi Pro. It makes controlling all the car's features, together with your connected devices, incredibly simple. And it comes with a 10" Touchscreen integrated into the dashboard, plus a lower 5.5" Touchscreen with multi-function dynamic dials. In front of the driver there is a high-definition Interactive Driver Display. Through this you can access our powerful navigation system with range-maximising route recommendations.

INTERIOR CRAFTSMANSHIP AND SPACE

An electric architecture has allowed our designers to combine luxury craftsmanship with generous amounts of interior space and storage. The absence of a transmission tunnel is an opportunity for a 10.5 litre cubby bin beneath the centre armrest. No conventional gearbox means there is storage within the 'floating' centre console perfect for phones and keys. Completing I-PACE's carrying capacity, the rear loadspace is up to a substantial 1,453 litres⁵ with the under bonnet front stowage compartment providing an additional 27 litres. See page 33 for details.

EXTERIOR DRAMA

I-PACE's radical sweeping cab-forward profile, dramatic bonnet scoop and Jaguar signature rear haunches are far more than striking design elements. They form integral parts of the car's aerodynamics and help deliver a low drag coefficient of 0.29Cd to improve range. See page 8 for details.

¹Connected Navigation will require further subscription after the initial term advised by your Jaguar Retailer. ²Compatible smartphones only. Your car is prepared for Apple CarPlay. The services offered by Apple CarPlay depend on feature availability in your country, please see https://www.apple.com/za/ios/feature-availability/#apple-carplay for more information. ³Compatible smartphones only. Your car is prepared for Android Auto. The services offered by Android Auto depends on feature availability in your country, please see https://www.android.com/intl/en_za/auto/ for more information. ⁴Remote contains subscription services that can be extended after the initial term advised by your Jaguar Retailer. The Remote App will need to be downloaded from the Apple App Store/Google Play Store. ⁵Loadspace volume is reduced by 18 litres with Air Suspension.

In-car features should be used by drivers only when safe to do so. Drivers must ensure they are in full control of the vehicle at all times.

Pivi and InControl features, options, third party services and their availability remain market dependent – check with your Jaguar Retailer for local market availability and full terms. Mobile network connectivity cannot be guaranteed in all locations. Information and images displayed in relation to the InControl technology, including screens or sequences, are subject to software updates, version control and other system/visual changes depending on options selected Apple CarPlay is a Trademark of Apple Inc. Apple Inc end-user terms may apply.

Android Auto is a Trademark of Google LLC. App Store is a trademark of Apple Inc. Google Play Store is a trademark of Google LLC.

SUILD YOUR OWN

DESIGN EXTERIOR

I-PACE's revolutionary design is both true to the spirit of Jaguar and the I-PACE concept. From the pronounced front wheel arches to the rear diffuser, every supercarinspired styling element allows I-PACE to slice cleanly through the air for maximum range and stability. The bold grille curves inwards – reducing drag by channelling air through the bonnet scoop and out, where it passes over a roofline that is curved for maximum efficiency. The roof itself is fixed panoramic glass. Ensuring that airflow passes smoothly around the entire exterior, integrated deployable door handles sit flush with the car's sides. Giving a distinctive on-road presence, I-PACE's slim futuristic Premium LED headlights feature our signature double 'J' blade graphic. For even greater visibility and safety at night, choose optional Matrix LED headlights with signature Daytime Running Lights (DRL).

This system maintains continuous use of the high beam, but automatically adjusts the shape of the beam to help avoid dazzling oncoming vehicles. The sleek tail lights are also LED, with the same dramatic Animated Directional Indicators as the headlights.

INTERIOR

Maximum front headroom with fixed panoramic roof fitted	1,013mm
Rear headroom	968mm
Maximum front legroom	1,040mm
Maximum rear legroom	890mm

I-PACE reimagines the classic Jaguar balance of sports car focus and luxury craftsmanship for the digital age. Electric architecture defines the five-seater cabin's character. The cab-forward design means the front seats are placed further forward. This creates more space between the front and rear seats, giving rear seat passengers added legroom and knee room. Driver and front passenger feel an immediate sense of engagement with the car thanks to form-fitting sport seats. Deepening the sense of driver focus, the instrument panel is low, with minimalist lines wrapped in soft leather. Throughout the spacious interior, beautiful, handcrafted touches reaffirm the cabin's luxury atmosphere. Rich, solid finishers surround you and fine contrast twin-needle stitching adds tailored sophistication.

INTERIOR SHOWN: I-PACE HSE WITH LIGHT OYSTER WINDSOR LEATHER SEATS WITH LIGHT OYSTER INTERIOR AND LIGHT OYSTER HEADLINING (MARKET DEPENDENT)

DESIGN 10

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	PRACTICALITY	

Whatever combination of materials you choose, their modern feel will complement I-PACE's stylish, uncluttered environment. To complete the interior, there's the standard full-length panoramic glass roof which, thanks to its tint and infraredabsorbing laminate construction, prevents strong sunlight, UV light and heat from entering the cabin. As well as flooding the interior with natural light, the panoramic glass roof maintains comfortable cabin temperatures in hot, sunny conditions and keeps the cabin warm in cold climates. At night, the optional Premium cabin lighting accentuates the vehicle's exquisite details.

The cabin is a sanctuary from the outside world. For outstanding refinement, sophisticated motor encapsulation dampens sound while the sharp exterior design minimises wind noise.

To enhance your sense of wellbeing, simply activate the optional PURIFY button and a specially-designed filter will attract and capture fine particulates from outside the car, such as PM2.5 and airborne allergens like dust and pollen. This ingenious system cleanses the air in the cabin environment by reducing the occupants' exposure to harmful pollutants, so everyone will be pleasantly comfortable from the moment they step inside. You can also pre-heat or pre-cool the cabin via your Jaguar Remote app*. See page 22 for details.

*Remote contains subscription services that can be extended after the initial term advised by your Jaguar Retailer. The Remote App will need to be downloaded from the Apple App Store/Google Play Store.

App Store is a trademark of Apple Inc. Google Play Store is a trademark of Google LLC.

DESIGN 11

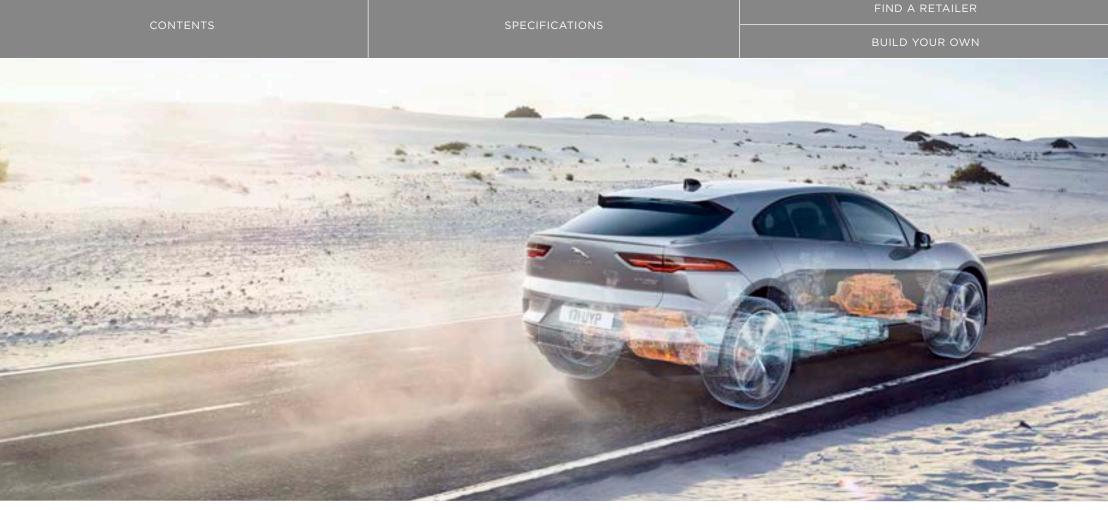

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	PRACTICALITY	

PERFORMANCE POWERTRAIN

Under the skin, I-PACE is radically different from an internal combustion-engined car. Instead of a petrol or diesel engine, it features two extremely lightweight and compact Synchronous Permanent Magnet Electric Motors. Both motors are up to 97 percent efficient when transferring power from the battery to the motor – an internal combustion engine is typically only 30-40 percent efficient when producing power from fossil fuels. They were developed by Jaguar engineers to take advantage of the knowledge experienced and collected from the I-TYPE Formula E racing car. To deliver maximum power in the smallest possible footprint, the two Synchronous Permanent Magnet Electric Motors are axle-mounted and use concentric single-speed transmissions. The motors are also positioned lower in the vehicle, contributing to the low centre of gravity and enhancing I-PACE's control, handling and agility. It also enables the combination of a spacious cabin with a 656 litre luggage compartment.

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	PRACTICALITY	

Battery Pack Electric Motors

Transforming the driving experience, I-PACE's electric motors are quieter and create fewer vibrations than conventional internal combustion engines – with none of the interruptions normally associated with gear changes. They provide superior operating efficiency, torque delivery and respond immediately to your demands. For electrifying performance, I-PACE delivers up to 696Nm of torque with maximum torque available from zero rpm.

Positioned as low down as possible and right between the axles, I-PACE's 90kWh battery is constructed of high energy density lithium-ion pouch cells. It's designed for longevity and supports protracted periods of sustained maximum power.

I-PACE constantly maintains the ideal temperature for its battery using state-of-the-art thermal management systems. For your peace of mind, I-PACE's 90kWh battery comes with an eight year 160,000km warranty*.

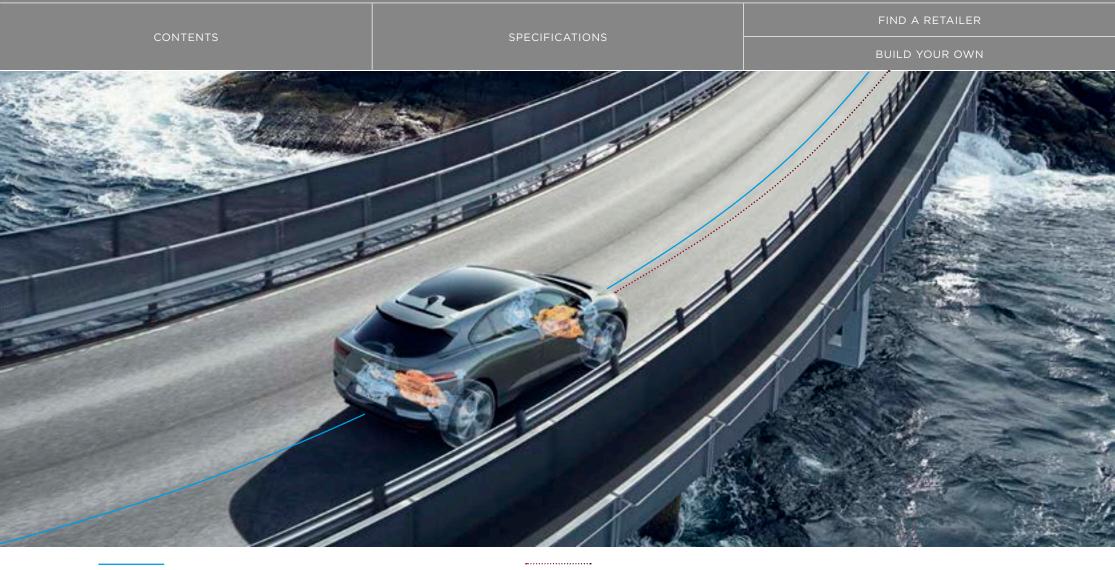

At Jaguar, we understand that it takes more than zero tailpipe emissions to drive sustainable change. That's why, from the earliest stages of I-PACE's development, we established a comprehensive plan to meet the End of Life Vehicles Directive (ELV) in the European Union. For further information please visit jaguar.co.za/faqs

*I-PACE's 90kWh battery warranty is limited to eight years or 160,000km (whichever comes first). It is redeemable in the case of any manufacturing defect or should a certified Jaguar Retailer measure that the battery has dropped below a 70 percent State of Health.

VEHICLE SHOWN: I-PACE HSE IN EIGER GREY WITH OPTIONAL FEATURES FITTED (MARKET DEPENDENT)

PERFORMANCE 13

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	PRACTICALITY	

Torque Vectoring by Braking applies brake pressure to slow the inside front or inside rear wheels independently, helping to prevent understeer and stay on the true line of travel.

Possible understeer without Torque Vectoring by Braking technology.

PERFORMANCE TECHNOLOGY

I-PACE is underpinned by an advanced electric vehicle architecture created specifically for this car that delivers excellent driving dynamics while minimising weight. These foundations are paired with a suspension setup proven on F-PACE, XE and XF. The double wishbone suspension at the front and Integral Link suspension at the rear have been tuned to give I-PACE the perfect balance of dynamic handling and refinement.

VEHICLE SHOWN: I-PACE HSE IN EIGER GREY WITH OPTIONAL FEATURES FITTED (MARKET DEPENDENT)

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	PRACTICALITY	

TORQUE VECTORING BY BRAKING

Torque Vectoring by Braking delivers controlled, responsive cornering by reducing near-limit understeer through controlled braking of the inside wheels.

ALL WHEEL DRIVE

The electric All Wheel Drive (AWD) system features two independently controlled motors, one on the front axle and one on the rear. This means that no complex mechanical connection is required between the two axles to deliver AWD capability. The system uses sensors to continually monitor driver inputs and available traction, calculating the optimum torque delivery at all four wheels to maximise available grip.

ALL SURFACE PROGRESS CONTROL

All Surface Progress Control (ASPC) is a state-of-the-art system that enables you to set and maintain a steady speed in challenging conditions such as slippery surfaces, including mud, wet grass, ice, snow and dirt roads. Operating like a conventional cruise control system, it functions between 3.6km/h and 30km/h, enabling you to maintain full concentration on the road ahead.

JAGUARDRIVE CONTROL WITH ADAPTIVE SURFACE RESPONSE¹

JaguarDrive Control with Adaptive Surface Response (AdSR) recognises differences between surfaces to exploit the maximum available grip. Drawing on Jaguar Land Rover's unrivalled expertise with All Wheel Drive systems, AdSR constantly monitors the car's environment and adjusts the appropriate motor and brake settings. Once selected, AdSR works at all speeds to support you in adverse weather and across challenging surfaces.

LOW TRACTION LAUNCH

For optimum torque control when you move off from a standstill, select Low Traction Launch on the Touchscreen. This system enhances capability in slippery conditions like wet grass, snow and ice. It remains active until the car reaches 30km/h – then I-PACE seamlessly blends back into the selected driver mode.

DYNAMIC MODE AND CONFIGURABLE DYNAMICS

Engaging Dynamic Mode amplifies I-PACE's sporting character. Throttle response is sharpened, the dampers are stiffened and steering weighting is increased. I-PACE's Interactive Driver Display and Configurable Ambient Interior Lighting instantly take on a red glow.

The Configurable Dynamics system allows you to personalise I-PACE's Dynamic Mode. Via the Touchscreen, driving characteristics can be changed to Dynamic or left as normal. So whatever combination of throttle sensitivity, steering weighting or damper stiffness you want, Configurable Dynamics allows you to set up Dynamic Mode to suit your driving needs.

ACTIVE SUSPENSION WITH ADAPTIVE DYNAMICS²

The sophisticated optional Active Suspension automatically lowers the car by 10mm when travelling at speeds in excess of 105km/h over extended periods of time, when certain conditions are met. Reducing the space between the car and road improves aerodynamic performance and therefore optimises range.

The Adaptive Dynamics system optimises ride comfort and dynamic body control using continuously variable damping technology. The system monitors multiple sensors that analyse vertical wheel positions, vehicle acceleration, steering inputs, as well as throttle and brake pedal activity to adjust the suspension damping settings. This provides the optimum balance between comfort, refinement and agility.

ELECTRONIC AIR SUSPENSION

I-PACE's optional Electronic Air Suspension can be lowered or raised at the touch of a button. If improved ground clearance is required, it is possible to raise the suspension up to 230mm. Alternatively, for ease of access the suspension can be lowered. This ensures that I-PACE is prepared for any eventuality.

¹Only available with Adaptive Dynamics. ²Only available with Electronic Air Suspension.

All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	PRACTICALITY	

CHARGING

Charging I-PACE is convenient and safe. This means you can top up the battery whenever you wish, to ensure your car's ready for when you need it. It's completely safe to charge the car in the rain or even when parked in snow as the charging system is entirely self-contained. The battery charge connector is conveniently and discreetly located on the front wheel arch, while the charge port allows access to all common international charging standards. The Timed Charging' facility allows you to set specific charging times via the Touchscreen or via your Jaguar Remote App. This lets you take advantage of off-peak electricity tariffs.

PUBLIC CHARGING

On longer journeys you may need a quick top up of your battery's charge to complete your trip. DC rapid chargers are the best way to deliver this - a typical 50kW charger can deliver up to 63km of range in 15 minutes². As the public charging infrastructure improves, I-PACE is equipped to accept up to a 100kW DC charge rate. This means you can easily add up to 100km of range in the time it takes to have a cup of coffee. Depending upon the service provider, public AC chargers can have a range of outputs.

You can also find convenient charging points at places you may want to stay for several hours – or even overnight – including local shopping centres, hotels and gyms. Every I-PACE comes with a public charging cable (Mode 3 charging cable) as standard. Pull up, plug in, then go enjoy yourself.

DC 100KW UP TO 127KM OF RANGE IN 15 MINUTES

¹Timed Charging available from winter 2021. ²A DC rapid charger provides large amounts of energy in a short amount of time. The charging rate decreases as the battery reaches full capacity, therefore in most use cases it is quicker to rapid charge up to 80 percent capacity or for the extended range required. Actual charge times may vary according to environmental conditions and available charging installation. To find out more about charging times in your country, visit jaguar.com/charging for more details.

Charging times will vary dependent on many factors, including but not limited to: the age, condition, temperature and existing charge of the battery; facility used and duration of charge.

The figures provided are as a result of official manufacturer's tests in accordance with EU legislation with a fully charged battery. For comparison purposes only. Real-world figures may differ. Energy consumption and range figures may vary according to factors such as driving styles, environmental conditions, load, wheel fitment, accessories fitted, actual route and battery condition. Range figures are based upon production vehicle over a standardised route. **VEHICLE SHOWN: I-PACE HSE IN EIGER GREY WITH OPTIONAL FEATURES FITTED**

(MARKET DEPENDENT)

PERFORMANCE

TECH<u>NOLOGY</u>

SAFETY

Charging the battery at home couldn't be easier. For optimum charging, you can install an approved Jaguar wall box¹. I-PACE is equipped with an 11kW 3-phase AC on-board charger², which can fully recharge the vehicle overnight and deliver up to 35km of range per hour.

To ensure that you are always able to charge I-PACE, the vehicle also comes with a Home Charging Cable, as optional, that is used with a domestic socket. When linked to a domestic socket, charging rates are slower than a wall box (up to 9.5km of range per hour), but are sufficient to cover the average daily commute of 60km³ if the vehicle is charged overnight. Charging information can be accessed by your Remote App, see page 22 for more information.

AC 11kW UP TO 35KM OF RANGE PER HOUR AC 11kW 0-100 % CHARGE 8.5 HOURS

¹Jaguar have authorised charging infrastructure partnerships for all markets in which I-PACE is available. Our infrastructure partners are available to advise of the best solutions for you. Please consult your Jaguar Retailer for further information. ²11kW electricity supply is available in most countries. ³This figure has been obtained from the 'Driving and Parking Patterns of European Car Drivers' mobility survey, conducted by the European Commission.

Charging times will vary dependent on many factors, including but not limited to: the age, condition, temperature and existing charge of the battery; facility used and duration of charge.

PERFORMANCE

INFOTAINMENT

Delivering a wealth of information and entertainment, every I-PACE is equipped with Pivi Pro, our simplest and most intuitive infotainment system ever. It features an at-a-glance layout that enables you to carry out frequent tasks and use commonly accessed features on the home screen, including navigation, phone and media. You can easily customise the layout and add additional information or features.

PIVI PRO

For increased flexibility and efficiency, the standard 10" and 5.5" dual highdefinition Touchscreens¹ allow the user to view information, while simultaneously being able to interact with additional features. Direct access to cabin and seat temperature controls are also available via the multi-function dynamic dials. For a truly elegant and streamlined appearance, the steering wheel also has hidden-until-lit, touch-sensitive switches as standard. One of these switches is programmable, so it can be personalised to your preferences for a host of functions.

INTERACTIVE DRIVER DISPLAY

The high-definition Interactive Driver Display can receive and project a vast amount of driving information, entertainment and active safety data including navigation, phone and media. Its high resolution ensures the utmost clarity and its refined processing engine delivers smooth-moving, pin-sharp graphics. To help you find your way more easily, the all-new Navigation System* enables you to display full screen navigation with 3D mapping (where available).

HEAD-UP DISPLAY

To help reduce distraction or the need for you to take your eyes off the road, optional Head-up Display presents key vehicle data such as your speed and navigation directions on the windscreen. It features crystal-clear, full-colour graphics in high resolution, enabling you to see all driver inputs and information with ease. It can display important phone information from the Pivi Pro Touchscreen such as the name or number of an incoming caller. The feature can be turned on and off dependent on driver preference.

MERIDIAN[™] AUDIO EXCELLENCE

As Jaguar's audio partner, Meridian have introduced technologies which help ensure that I-PACE is a superb space in which to experience sound. Digital Signal Processing delivers performance that would otherwise require significantly larger speakers, while Cabin Correction tailors the sound to I-PACE's precise acoustics. Digital Dither Shaping preserves performance details to evoke the emotions of the original recording. Exclusive to Meridian, Trifield[™] produces a consistent, concert-like experience for all occupants. I-PACE offers the 400 watts, 11 speaker, 1 subwoofer Meridian Sound System as standard. The 750 watts, 16 speaker, 1 subwoofer Meridian 3D Surround Sound System is offered as an option.

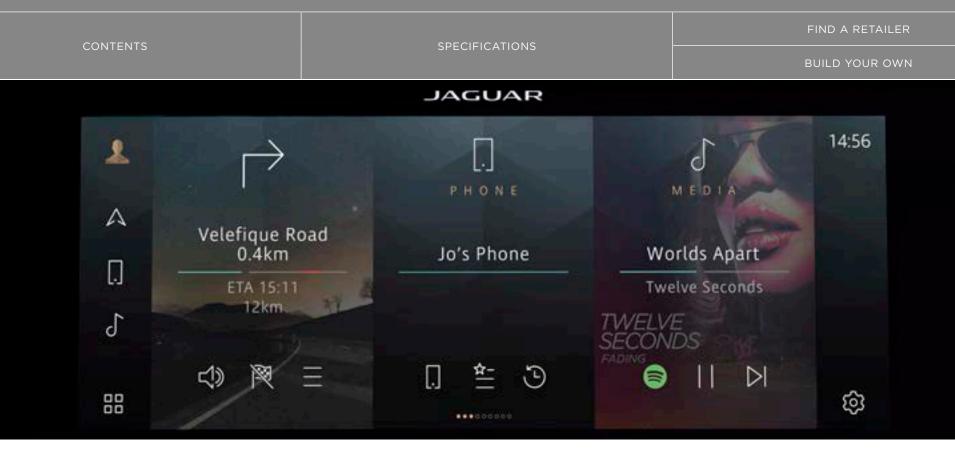

*Connected Navigation will require further subscription after the initial term advised by your Jaguar Retailer.

In-car features should be used by drivers only when safe to do so. Drivers must ensure they are in full control of the vehicle at all times.

Pivi and InControl features, options, third party services and their availability remain market dependent – check with your Jaguar Retailer for local market availability and full terms. Meridian is a registered trademark of Meridian Audio Ltd. Trifield and the "three fields" device is a trademark of Trifield Productions Ltd.

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	PRACTICALITY	

CONNECTIVITY

InControl is Jaguar's suite of features that connects you to your vehicle and links you seamlessly, and securely, with the outside world. There are a range of packs and features included as standard on I-PACE. Select the appropriate apps and some of the InControl features stay with you, even when you are away from the car, to make sure the Jaguar experience is more enjoyable than ever.

PINPOINT TOUCH CONTROL

Pinpoint touch control allows you to interact with information swiftly. The Touchscreen responds in the same manner as a smartphone or tablet computer, providing multi-touch gestures such as pinch-to-zoom and swipe.

PERSONALISED HOMEPAGE

The beauty of Pivi Pro is that it's so versatile. With room on the home screen for three swipeable panels at any one time, you can set it up to display your preferred choice of features. For example you may want Navigation, Media Player and Phone – giving you the option to customise your homepage with the features you use most and see all the information you need at a glance.

MULTIMEDIA

Enjoy a range of multimedia features on the Touchscreen. Connect your device and see details of playlists and music displayed by artist, album and genre.

In-car features should be used by drivers only when safe to do so. Drivers must ensure they are in full control of the vehicle at all times.

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	PRACTICALITY	

ALL-NEW NAVIGATION

With Pivi Pro's All-new Navigation System*, you can stay connected to your route with real-time traffic updates and live access to charging points, parking and place information. All displayed in exceptional 2D or 3D detail. Voice guidance automatically mutes during familiar routes so you can enjoy music without interruptions.

You'll also be able to save your favourite places and use pinch-and-zoom gestures for simple map exploration. There are new features too, such as 'machine learning', which gets to know the roads you prefer and gives you the option of taking different or faster routes. What's more, regular automatic map updates ensure the maps you use are always accurate and up-to-the-minute.

Real Time Traffic Information – Uses live traffic data feeds to give you the most accurate picture of what the traffic is like on the way to your destination.

Online Search – Wherever you are, you can search the surrounding area for places of interest. The system can access expert destination information, travel tips and inspiration as well as online travel reviews of the local area.

Commute Mode – Allows the system to learn your commutes and automatically advises you of the expected journey time based on live and historical traffic movements without you having to input a destination. The system learns the routes you take for a given destination and then advises which of those is the quickest. The feature can be turned on and off dependent on driver preference.

Parking Service – As you approach your destination, you can see where parking is available. Simply tap on your preferred car park and the navigation system updates to direct you to it.

Online Routing - While you're on your way to a destination the system monitors live traffic conditions and takes into account typical traffic patterns for that time of day, keeping you on the optimum route.

*Connected Navigation will require further subscription after the initial term advised by your Jaguar Retailer.

REMOTE¹

The Jaguar Remote smartphone app, available for download, provides information on your vehicle and enables you to interact with it remotely. Compatible with most smartphones, Android[™] Wear or the Apple Watch[®], this service includes:

Charging Status Information – Stay continually updated with key battery function indicators including charge state, charging status, charge rate, plug state and estimated EV range.

Remote Charging Control² – Use your smartphone to remotely start and stop charging, manage charging tariffs and even set the maximum state of charge.

Remote Lock/Unlock – Lock or unlock your doors remotely with the click of a button. Simply press the 'lock' button on the Vehicle Security screen of the Jaguar Remote smartphone app to single lock the doors, arm the alarm, fold in the wing mirrors and close the windows. Press the 'unlock' button to unfold the wing mirrors, turn on the dipped headlights and cause the hazard lights to flash twice.

Remote Climate – Prepare your Jaguar in advance by pre-heating or pre-cooling the cabin, so that you and your passengers are comfortable from the moment you step inside.

Beep/Flash – This feature turns on your Jaguar's hazard lights and dipped headlights, and sounds an audible alert to help you locate your vehicle in a crowded car park.

Journey Tracking – This opt-in feature can automatically record your journey history including your route and mileage statistics. This information can be exported by email to use for expense reporting and can be imported to a spreadsheet.

Vehicle Status Check – Check current range levels, and status of door and window position and locks. See the last parked location of the vehicle and find your way back to it with on-foot directions.

Jaguar Optimised Assistance – If you break down you can make a direct call to the Jaguar Assistance team by pressing the button on the overhead console or from the Assistance screen within the Jaguar Remote smartphone app.

SOS Emergency Call - In a more serious incident, SOS Emergency Call will automatically connect you to the emergency response team who will notify the emergency services to your location. For peace of mind, this service is provided for the first ten years from date of registration.

¹Remote contains subscription services that can be extended after the initial term advised by your Jaguar Retailer. The Remote App will need to be downloaded from the Apple App Store/Google Play Store. ²Timed Charging available from winter 2021.

In-car features should be used by drivers only when safe to do so. Drivers must ensure they are in full control of the vehicle at all times.

Pivi and InControl features, options, third party services and their availability remain market dependent - check with your Jaguar Retailer for local market availability and full terms. Mobile network connectivity cannot be guaranteed in all locations. Information and images displayed in relation to the InControl technology, including screens or sequences, are subject to software updates, version control and other system/visual changes depending on options selected.

DRIVER ASSISTANCE

HELPING MAKE DRIVING EASIER

From negotiating city traffic or the motorway, to providing additional safety for you and your passengers, there's a wealth of innovative technologies available; either as standard, optional or as part of an optional pack. Whichever you choose, you'll find every feature has been designed and engineered to heighten your enjoyment of the vehicle.

STANDARD FEATURES

Emergency Braking can help to prevent collisions with other vehicles, as well as cyclists or pedestrians. If a potential frontal collision is detected, a warning is displayed, giving you time to take action. A camera at the front of the vehicle monitors at speeds from 5km/h to 80km/h for frontal collisions, 5km/h to 60km/h for pedestrians and from 20km/h to 60km/h for cyclists. If a collision is still anticipated and you have taken no action, this system will apply the brakes to help reduce the severity of the possible impact.

Rear Camera provides improved visibility when reversing. To assist with parking, static lines representing the projected path of your vehicle appear on the Touchscreen.

Driver Condition Monitor detects if you're starting to feel drowsy by monitoring steering inputs, brake and throttle pedal activity to give you an early warning when you need to take a break.

Lane Keep Assist detects when your vehicle is unintentionally drifting out of your lane and applies a corrective torque to the steering wheel, encouraging you to guide your vehicle back.

Front and Rear Parking Aid makes manoeuvring easier. Simply select Reverse, or activate via the Touchscreen. On-screen graphics and audio feedback will indicate your proximity to any possible obstacles nearby.

All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

BUILD YOUR OWN

Blind Spot Assist

OPTIONAL FEATURES

3D Surround Camera uses four different inbuilt cameras to deliver an innovative, third-person visualisation of your I-PACE. New 3D perspectives and a 360° overhead view make manoeuvring easier.

OPTIONAL PACKS

PARK ASSIST PACK

3D Surround Camera

Park Assist Pack makes car parking easier by steering your I-PACE into a suitable space. It also performs braking, gear changing and accelerating functions. Simply press park and the car will do the hard work for you.

Park Assist makes parallel and perpendicular parking easier. It automatically detects any available spaces and steers the vehicle into and out of them – parking the car for you. Graphics and notifications guide you through the manoeuvre.

3D Surround Camera uses four different inbuilt cameras to deliver an innovative, third-person visualisation of your I-PACE. New 3D perspectives and a 360° overhead view make manoeuvring easier.

STANDARD PACKS

BLIND SPOT ASSIST PACK

If you're changing lanes, leaving a space or just getting out of the car, Blind Spot Assist Pack alerts you to approaching vehicles in those hard-to-see situations.

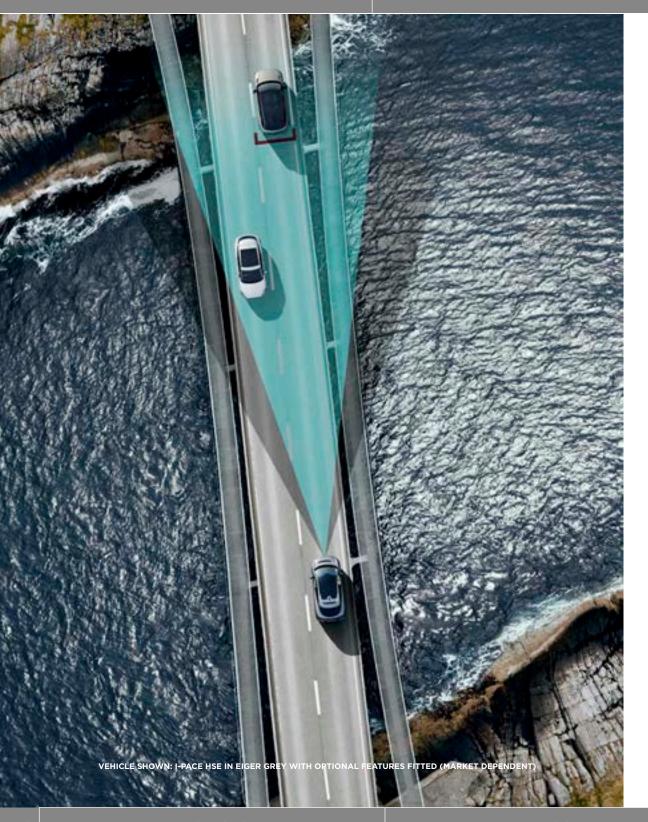

Blind Spot Assist can help you prevent collisions. If your vehicle detects another car in your blind spot when you begin to change lanes, a small warning light illuminates in the corresponding wing mirror. Corrective torque is also applied to the steering wheel, encouraging you to guide your vehicle away from the approaching vehicle.

Rear Traffic Monitor is particularly useful when reversing out of a parking bay. The system warns you of vehicles, pedestrians or other hazards approaching from either side of your vehicle. It will alert you with both audio and visual warnings so you know what's behind you even when the view is obstructed.

Clear Exit Monitor alerts passengers leaving the vehicle from the rear doors to any approaching cars, cyclists or other hazards. If an incoming obstacle is detected, a warning light will flash on the door. The light will immediately go off when it is clear to open the door.

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	PRACTICALITY	

STANDARD PACKS (CONTINUED)

DRIVER ASSIST PACK

This pack offers a wide range of driver aids, including those found in the Blind Spot Assist Pack, plus Adaptive Cruise Control with Steering Assist and Rear Collision Monitor. Together, they make motorway driving and heavy traffic situations easier, safer and much more enjoyable. The cruise control system achieves this by gently assisting acceleration and braking, while maintaining a set distance from vehicles ahead.

Adaptive Cruise Control with Steering Assist works with you: as you keep your hands on the wheel anticipating the road ahead, the system uses a camera and radar to track vehicles and lanes in front of you and assists with steering, braking and acceleration. You are always in control.

TECHNOLOGY 26

INTRODUCTION

SAFETY

PERFORMANCE

PRACTICA

EFFICIENT TECHNOLOGIES

FLOW ENHANCED DESIGN

The flow enhanced design of I-PACE, with its 0.29Cd drag coefficient, maximises aerodynamic efficiency and range. At the front, the top of I-PACE's grille curves inwards – enhancing aerodynamics by drawing air through the bonnet scoop. The slender spoiler and flush door handles keep airflow running smoothly over the car. Aerodynamically optimised side skirts also blend form and function by channelling air more efficiently around the wheels. At the rear, the squared off corners optimise aerodynamic performance by encouraging air to detach cleanly and efficiently from the car in a controlled way that minimises the pressure differences that cause drag.

HIGHLY EFFICIENT ELECTRIC MOTORS

Efficient use of its battery energy helps give I-PACE strong performance and range figures. I-PACE's electric motors are up to 97 percent efficient, whereas an equivalent internal combustion engine is typically only 30-40 percent efficient.

ACTIVE VANES

To give the optimum balance between cooling and aerodynamics, Active Vanes open when cooling of the batteries is required, but close when not needed to smooth airflow.

ECO MODE

Eco Mode helps optimise I-PACE's range on long drives. This mode modifies the car's settings to reduce energy depletion as well as encouraging a more efficient driving style by displaying a 'driving style rating' in the message centre. Eco Mode can make subtle changes to cabin heating and cooling, the amount of air recirculation and to a number of the car's features. If required, the driver can override these changes by normal operation of each feature or via the menu settings.

ACTIVE SUSPENSION WITH ADAPTIVE DYNAMICS

To improve aerodynamic performance and range, I-PACE's optional Active Air Suspension lowers the car by 10mm when travelling at speeds in excess of 105km/h. See page 15 for details.

ENHANCED BRAKE REGENERATION SYSTEM

As soon as the driver lifts off the accelerator, the Enhanced Brake Regeneration system in the motors efficiently converts available kinetic energy to electricity to charge the battery. Driving in heavy traffic is also simpler – using the Touchscreen, you can raise the level of regenerative braking. The corresponding increase in deceleration means that, in stop and go traffic for example, there is far greater control of the car's speed using only the throttle.

HEAT PUMP

I-PACE's highly efficient heat pump maximises real-world EV range, without compromising on passenger comfort. The heat pump is also significantly more energy efficient than a conventional automotive heating system. It harvests heat from the outside air and electronic components of I-PACE. The collected heat transforms a special liquid within the heat pump into a gas, which causes it to rise in temperature. The warmth is transferred to the cabin via the heating and ventilation system, reducing the power demand from the vehicle battery and maximising range – even in freezing winter conditions, when you need it most.

INTRODUCTION

DESIGN

PERFORMANCE

TECHNOLOGY

SAFE AND SECURE

Designed for optimum safety, I-PACE has been engineered to include a wealth of features not only to help protect you and your passengers, but to actively help prevent accidents from happening. Sure-footed All Wheel Drive (AWD) capability helps you stay firmly planted on the road, whatever the weather or environment throws at you (see page 15 for details).

Dynamic Stability Control (DSC) monitors I-PACE's dynamic behaviour, intervening to maximise vehicle stability. DSC reduces motor torque and applies braking to the appropriate wheels to correct the vehicle's direction of travel by counteracting understeer or oversteer.

Electronic Traction Control (ETC) optimises traction and stability by controlling wheel spin. The ETC system reduces torque to the spinning wheel, then applies braking to the wheel, if required.

Motor Drag Torque Control mitigates the chance of wheel lock-up caused by strong regenerative braking in slippery conditions. It acts by briefly increasing torque to the driven wheels as appropriate.

Roll Back Protection ensures you do not roll backwards as you pull away on an incline.

Roll Stability Control (RSC) is integrated with DSC to reduce the possibility of rollover, while providing agility and ability to steer around obstacles. It monitors the vehicle motion and cornering forces to detect any potential risk of rollover. When risk is detected, braking is applied to the outside front wheel to reduce forces which contribute to rollover.

Emergency Brake Assist (EBA) understands when you apply the brakes quickly but without the necessary force to maximise stopping performance. It therefore boosts the brake pressure through the ABS pump to ensure you stop in time. To help reduce the risk of a collision, the emergency brake lights automatically activate the hazard warning lights during emergency braking.

Emergency Braking gives an audible forward collision warning should a potential frontal collision be detected. Visual warnings follow. If you take no action, the system applies the brakes to help reduce the severity of the possible impact. See page 24 for details.

Anti-lock Braking System (ABS) allows the vehicle to maintain traction with the road surface while braking and prevents wheels from locking – thereby retaining the vehicle's ability to steer. The system helps to shorten the braking distance.

Electronic Brake-force Distribution (EBD) automatically varies the braking force to each axle in order to minimise stopping distance, while still maintaining stability and the vehicle's ability to steer.

All-round exterior LED lighting is standard on every I-PACE. LEDs are more energyefficient and produce a light close to daylight conditions for less tiring night-time driving. I-PACE's headlights feature signature Daytime Running Lights. At low speeds, optional Static Cornering Lights illuminate the area you are turning into. Auto High Beam Assist (AHBA) automatically dips the main beam for oncoming traffic. Optional Matrix LED headlights enable an Adaptive Driving Beam which works to increase visibility in all conditions. Animated Directional Indicators, which help other road users recognise your intended direction of travel sooner, are available with optional Matrix LED headlights.

SAFETY 29

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	PRACTICALITY	

FIND A RETAILER

BUILD YOUR OWN

DEPLOYABLE PEDESTRIAN SAFETY SYSTEM

An advanced front bumper sensor will, in the event of a collision, discriminate between a pedestrian and other objects. The sensor then activates the deployable Pedestrian Protection System and provides a zone to cushion the impact.

EXTERNAL SOUND SYSTEM (ESS)

As the electric powertrain of I-PACE is almost silent at low speeds, an external acoustic signal is emitted under 20km/h to help make pedestrians aware of the car's presence.

ISOFIX AND AIRBAGS

To improve safety, two ISOFIX points for baby/child seat restraints are fitted on each side of the rear seats and a comprehensive system of six airbags – including driver and passenger airbags, side curtain and thorax – are fitted as standard.

CHARGING/BATTERY SYSTEMS

The car will not engage Drive while the charging cable is plugged in, and a warning message will be displayed on the Interactive Driver Display.

SAFETY CELL

Designed for optimum safety, I-PACE utilises a combination of aluminium and steel to form a rigid cage around the occupants as well as the battery.

VEHICLE SHOWN: I-PACE HSE IN EIGER GREY WITH OPTIONAL FEATURES FITTED (MARKET DEPENDENT)

SAFETY 30

INTRODUCTION	DESIGN	PERFORMANCE	
TECHNOLOGY	SAFETY	ΡΡΑΓΤΙΓΑΙ ΙΤΥ	

EVERY DETAIL RECONSIDERED

I-PACE's space-efficient electric architecture offered numerous opportunities to create a highly practical interior – and we seized every one of them. Our designers have been able to place the front seats further forward, towards the space where the combustion engine would normally be, without compromising the driving position. This means there's a greater distance between the front and rear seats, giving rear seat passengers added legroom and comfort. Behind the rear seats, the loadspace is a substantial 656 litres¹ with a length of 967mm.

As the motors are integrated with the axles, the absence of a transmission tunnel has created space for a 10.5 litre cubby bin under the front centre armrest. It also means the floor of the interior is almost flat, leaving legroom for a passenger sitting in the middle rear seat. There's convenient storage space under the full width of the rear seats too. And because electric motors don't require a conventional gearbox, we've used this space to create room in front of the console perfect for phones and keys. If you need more room, both deep front door bins have been sculpted to carry a range of items. Completing I-PACE's carrying capacity is a front storage compartment that provides 27 litres of additional stowage.

I-PACE has plenty of handy places to connect your smartphone, tablet or other mobile devices. The centre console storage mat also doubles up as a wireless device charging pad with phone signal booster². This optional feature means you and your passengers can charge your devices at the same time. Beneath the 5.5" Touchscreen you'll find a USB port. Inside the rear console, there's a 12V power socket and two USB sockets.

Water and shockproof, all-new Activity Key³ lets you unlock, lock and start⁴ your vehicle. So whatever activities you and your friends have planned, there's no longer a need for conventional car keys.

¹Loadspace volume is reduced by 18 litres with Electronic Air Suspension. ²Compatible smartphones only. ³Activity Key can be charged in 1 hour, providing up to 7 days battery life. ⁴The Activity Key can only start the vehicle if keyless technology is available and activated. All in-car features should be used by drivers only when safe for them to do so. Drivers must ensure they are in full control of the vehicle at all times.

JAGUAR ASSISTANCE

Jaguar Assistance provides assistance in motoring emergencies, from immobilisation due to breakdown or accident to minor problems such as punctures. You can rely on our roadside assistance, whatever the situation, wherever you happen to be.

JAGUAR FINANCIAL SERVICES

New or used, for personal or business use, we have a finance option that puts you in complete control. Please speak to your local Jaguar Retailer to find out more.

INSURANCE

I-PACE's key components are easily accessible for time-efficient service and repair costs. With a focus on lower repair costs, I-PACE delivers competitive insurance group ratings. To find out more about the compelling business case for I-PACE, please contact your local Jaguar Retailer.

IMPORTANT NOTICE

Some features on images may vary between optional and standard for different model years and due to the impact of Covid-19, many of our images have not been updated to reflect 22MY specifications. Please refer to the car configurator and additionally consult your local Retailer for detailed 22MY specifications and do not base an order on website imagery alone. Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles, parts and accessories and alterations take place continually, and we reserve the right to change without notice.

COLOURS

Image colours reproduced here are provided for illustrative purposes only. Colours are reproduced on-screen and may therefore vary compared to the actual finish. The company reserves the right to alter or withdraw any colour finish without notice. Some of these colours may not be obtainable in your country. Please check availability of colours and current specifications with your local Jaguar Retailer. Distributors and Retailers are not agents of Jaguar Land Rover Limited and have absolutely no authority to bind Jaguar Land Rover Limited to any express or implied undertaking or representation.

ENVIRONMENTAL INNOVATION AT JAGUAR

Jaguar is committed to reducing dependency on fossil fuels, using fewer natural resources and creating less waste as part of our approach to responsible and sustainable business development.

Search 'Jaguar Environmental Innovation' for more details.

*I-PACE's 90kWh battery warranty is limited to eight years or 160,000km (whichever comes first). It is redeemable in the case of any manufacturing defect or should a certified Jaguar Retailer measure that the battery has dropped below a 70 percent State of Health.
