

GR 86

THE ICON IS BACK

The second-generation and even more powerful GR86 is here. Born from Toyota's supreme legacy of sports coupés, this lightweight, perfectly-balanced, rear-wheel driven beast is built to thrill.

Like all of Toyota's GR models, the GR86 is inspired by Toyota Gazoo Racing, a motorsports brand that's conquered some of the world's toughest races, including Dakar and the 24 Hours of Le Mans.

Applying engineering solutions mastered in the world's toughest test conditions – the racetrack – the GR86 is made by people who love driving, for people who love driving. The iconic GR86 now features a new, more powerful 2.4ℓ boxer engine that punches out more kilowatts and more bottom-end torque than ever before, whether powering off the line or out of your favourite hairpin corner.

THE GR86 IS BORN TO PERFORM.

CHOOSE YOUR TRANSMISSION

The GR86 comes in two models. Whether you're looking for ultimate control or incredible intuitive technology, there's a GR86 for you. The GR86 can be ordered either with a direct-shifting six-speed manual* or paddle-operated six-speed automatic transmission.

ALL TORQUE ALL ACTION

Befitting of its Gazoo Racing badging, the GR86 has been manufactured to deliver maximum performance on both the road and the track.

Its new, larger capacity, naturally aspirated 2.4ℓ flat-four petrol engine produces 174 kW @ 7 000 r/min and 250 Nm peak torque @ 3 700 r/min. Its D4-S dual-injection fuel system, comprising both direct and port injection, has been retuned to deliver a more aggressive throttle response.

Sharper, stronger suspension, a low centre of gravity and a near-perfect 53/47 front/rear weight distribution all contribute to the GR86's precision handling: the very essence of unadulterated driving exhilaration. Plus, a torque-sensing limited-slip rear differential keeps you in control at all times. Furthermore, the GR86 is one of the lightest sports cars on the market which is perfect for beating the stopwatch and getting your pulse racing.

The GR86 delivers thrills around every corner.

Its silhouette has been honed for a sharper, faster, more aerodynamic profile, and several motorsport-derived devices added to increase stability and create cleaner airflow. At the front, the GR-specific G-mesh grille exudes aggression. The grille is shouldered by full LED headlights equipped with adaptive cornering technology, as well as an Auto High Beam function that automatically switches between high and low beams when oncoming traffic is detected.

Underlining the GR86's thoroughbred credentials is the proud placement of GR badges on the front grille and boot lid.

Similar to Toyota's Le Mans-winning endurance race cars, to reduce drag, lift and add steering stability, the GR86 features air outlets behind the front wheels to allow air trapped in the wheel arch to escape. Specially mounted fins correspondingly condition airflow around the rear wheel arches. The GR86 also features lightweight, matte black, innovatively-styled 18" alloy wheels to make sure you look good while you're going fast.

The GR86 is designed to be driven by someone who loves driving.

**Available on selected models*

***SCULPTED
FOR SPEED***

WELCOME TO THE DRIVER'S SEAT

The GR86's interior has been crafted to feel like a classic sports car, featuring enhanced dynamics that evoke a pure driving performance. The silver-stitched sports seats are dressed in a combination of leather and suede, which apart from being breathable, grip occupants during cornering and braking. To complement the sporty, all-black interior adorned with silver accents, exclusive GR badges appear on the steering wheel, Push Start button and Smart Key (that enables keyless entry and exit).

Smartphones can be paired either via Apple CarPlay or Android Auto, and their contents displayed on the high-resolution 7" multi-information display. This screen also acts as the monitor for the GR86's reverse camera.

Finally, to enhance professional track activity – and excitement – when selected, the custom-designed Track Mode combination meter displays a shift indicator, oil and water temperatures and a lap timer.

THE DRIVER'S SEAT IS WAITING FOR YOU.

NO CUTTING CORNERS WHEN IT COMES TO SAFETY

Although the GR86 is made to deliver you an incredible driving experience, its athleticism does not come at the cost of safety.

The GR86 is fitted with an extensive suite of safety features.

Standard equipment includes front and rear Ventilated Disc-Brembo brakes, Anti-lock Brakes (ABS) with Electronic Brake-force Distribution (EBD), Brake Assist (BA), switchable Traction and Vehicle Stability Control (TSC and VSC), Hill Start Assist Control (HAC) and an Emergency Brake Signal System (EBS).

Both models are fitted with Toyota's comprehensive Safety Sense package that offers additional protective emergency countermeasures.

These include: a Pre-Crash System that warns the driver of rapidly approaching vehicles and other objects. Upon detection, emergency braking and safety belt bracing is activated to avoid or mitigate impact without driver input.

The Lane Keeping System with Lane Departure Alert detects lane markers and the edge of the road and where the vehicle is in relation to the lane. When deviation takes place, the driver is alerted.

The vehicle's brakes will then automatically endeavour to arrest any further departure from the lane.

Rear Cross Traffic Alert (RCTA) and the Blind Spot Monitor (BSM) will warn the driver of unseen objects behind the vehicle during lane changing manoeuvres, and when reversing into perpendicular flowing traffic. RCTA works in conjunction with the GR86's Rear Park Distance Control.

All models are fitted with an alarm and immobiliser, and for further peace of mind the doors lock automatically when the vehicle pulls away.

TOYOTA ENVIRONMENTAL CHALLENGE 2050

At Toyota, creating technologically advanced vehicles isn't our only priority; we're committed to lowering our environmental impact throughout our entire production process. How? By setting ourselves six challenges that will see us reach a truly world-changing goal: a positive environmental impact by 2050.

ZERO CO₂

CHALLENGE 1

NEW VEHICLE ZERO CO₂ EMISSIONS CHALLENGE

By owning a Toyota you would be contributing to the reduction of vehicle CO₂ emissions by 90% in 2050 as opposed to 2010. You will help us promote the development of next-generation vehicles and further accelerate the spread of these vehicles.

ZERO CO₂

CHALLENGE 3

PLANT ZERO CO₂ EMISSIONS CHALLENGE

You uphold the two main pillars of our strategy to achieve zero CO₂ emissions at our plants which are:

1. Developing and introducing low-CO₂ technologies with ongoing kaizen.
2. Adopting renewable energy sources and utilising hydrogen energy.

CHALLENGE 5

CHALLENGE OF ESTABLISHING A RECYCLING-BASED SOCIETY AND SYSTEMS

You have contributed to our 40 years on the challenge of resource recycling. Going forward, by rolling out to the world the technology and systems evolved in Japan, we will all continue working on the challenge of establishing a recycling-based society.

The message is clear – Toyota Motor Corporation (TMC) wholeheartedly supports the Paris Agreement and accepts the challenge to achieve carbon neutrality by 2050. The Paris Agreement is a legally-binding international treaty on climate change and is aimed at reducing the emission of gases that contribute to global warming. While this treaty was only adopted in 2015, Toyota has been innovating and investing in technology to reduce emissions and achieve carbon neutrality for well over 30 years. Toyota has also led the way with more electrified vehicles on the road than any other automaker.

THE TOYOTA GR86 RANGE HAS BEEN MANUFACTURED TO MINIMISE ITS CARBON FOOTPRINT.

Guided by the goals of the Toyota Environmental Challenge 2050, as little impact as possible is made on the environment during each step of the process. From design to manufacturing, to end-of-life recycling programmes, our planet always comes first. This is because the ultimate long-term goal for Toyota is to make all our vehicles as environmentally friendly as possible. With this in mind, the entire GR86 range has been designed to have very low CO₂ emissions.

ZERO CO₂

CHALLENGE 2

LIFE CYCLE ZERO CO₂ EMISSIONS CHALLENGE

You are lending a helping hand to Toyota's efforts to reduce to zero not only CO₂ emissions produced in travelling and manufacturing, but all CO₂ emissions including the process of materials production, disposal and recycling of vehicles.

CHALLENGE 4

CHALLENGE OF MINIMISING AND OPTIMISING WATER USAGE

In automobile manufacturing, we use water in painting, forging and other processes. Therefore, even a small reduction of its impact on the water environments is important. We have two measures to achieve this, comprehensive reduction of the amount of water used and comprehensive purification of the water and returning it to the earth.

CHALLENGE 6

CHALLENGE OF ESTABLISHING A FUTURE SOCIETY IN HARMONY WITH NATURE

Here at Toyota we have engaged in planting trees at our plants and environmental conservation activities in our surrounding areas. To establish a society where humans and nature coexist in harmony, we are promoting several activities to connect regions, the world and the future.

Toyota vehicles are known for their Quality, Durability and Reliability. Keeping your Toyota Genuine means no compromises in terms of safety, performance and resale value. The range of Genuine Products and Approved Services will ensure complete peace of mind throughout the ownership journey and beyond. For more information on how to Keep Your Toyota Genuine visit www.toyota.co.za/genuine

TOYOTA GENUINE PRODUCTS

For guaranteed fit and function, **Genuine Parts** are essential in maintaining the safety and reliability of your vehicle. They also comply with all safety, regulatory and environmental requirements, making it the obvious choice. The same exacting precision applies to **Toyota Accessories**, developed by engineers with extensive knowledge on vehicle integration - you can enhance the appeal and functionality of your GR86 without compromising its safety features or warranty. Warranties are about peace of mind, and the **Genuine Unlimited Warranty** is designed to provide superior cover (up to 10 years, unlimited mileage) and a seamless claims process thanks to full integration with Toyota systems. The **Genuine Extended Service Plan** also enjoys exclusive approval by Toyota SA and provides flexible extension options up to 10 years or 300 000 km to suit your period of ownership. Paying today's rates for tomorrow's maintenance is a sensible way to protect the resale value of your GR86 by means of a full service history.

TOYOTA APPROVED SERVICES

Specialised vehicle maintenance requires first-class facilities, advanced equipment and expert knowledge. **Toyota Quality Service and Value Service** not only promise accurate diagnosis and repair, but also a philosophy of building trust through a genuine concern for the needs of our customers. To complement the extensive network of Toyota dealers, we have a vast number of **Accredited Body and Paint Repairers**, selected on stringent criteria to ensure outstanding workmanship and customer service. You can maintain your vehicle's pristine condition without compromising its warranty thanks to the exclusive use of Genuine Parts by our Accredited Repairers. Offering 24-hour access to a full complement of assistance and recovery benefits, **Toyota Roadside Assistance** provides the peace of mind that competent support is only a phone call away.

TOYOTA GENUINE MEANS

✓ UNCOMPROMISED SAFETY ✓ GUARANTEED QUALITY ✓ PEACE OF MIND

TOYOTA FINANCIAL SERVICES

There is no 'one-size-fits-all' when it comes to vehicle finance and insurance, there is only you. With fast, flexible and convenient services we will structure the perfect Toyota GR86 deal for you.

At Toyota Financial Services, we believe that purchasing your Toyota should be as enjoyable as driving it. Toyota Financial Services is the fast, flexible and convenient means of financing your Toyota GR86.
