LEXUS
EXPERIENCE AMAZING

CHALLENGE **EVERYTHING** WITH THE REVAMPED **LEXUS RX**

How can an SUV be both progressive and sophisticated? We've challenged the conventions to bring you the all-new Lexus RX – a pioneer in its class. This distinctive range of vehicles is handcrafted according to the Lexus 'YET' philosophy: The Lexus RX has a heritage of defying the norms. It was the world's first luxury hybrid SUV, but progress didn't stop there. Lexus pushed the boundaries of innovation, integrating the heritage of craftsmanship and artistry with daring design.

From the sleek exterior, which offers aggressive agility, to the advanced technology that delivers increased connectivity and safety, the RX is truly in a league of its own. You challenge everything every day. Drive a car that does the same.

Four models make up the revamped RX range:

RX 350 EX
RX 350L EX
RX 450h SE
RX 350 F SPORT

Models shown left to right: RX 450h SE, RX 350 F SPORT and RX 350L EX.
South African vehicle specifications may differ.

DEFY THE CONVENTIONS

How can a car be both strong and seductive, aggressive yet elegant? We've redesigned the exterior of the Lexus RX to establish a greater sense of synergy, intertwining traditionally contrasting ideas to create something completely original. You'll never stop evolving with the new Lexus RX.

A modern silhouette composed of sleek yet solid lines flows from the front bumper to the side doors. This establishes a unique sense of unity unlike anything that you have ever seen before. The new and improved RX front and rear bumpers feature rounded edges that revolutionise the design, making it more dynamic and distinctive on the roads.

From the unconventional slit-shaped headlights for unrivalled precision, to the unique mesh pattern of the spindle grille, the RX is an SUV that looks and feels like it's just driven out of the future. You don't conform to the rules, you shouldn't drive a car that does.

Model shown RX 450h SE.

South African vehicle specifications may differ.

BREAK THE **BOUNDARIES**

Can an SUV be so dynamic that it becomes an extension of the driver? We've gone beyond the mundane by embracing the *Omotenashi* philosophy, which calls for unparalleled hospitality and increased connectivity.

From the hand-stitched leather seats and dashboard to the advanced technology, this model is the equilibrium of efficiency and elegance.

UNLEASH YOUR POTENTIAL

Can the integration of technology enhance your efficiency without affecting your focus? We looked at what has already been done in other markets and asked, "Can we do it better?" The answer was yes. We made driving more captivating, succinct and intuitive, which is why the Lexus RX is a leader in the luxury SUV category.

Reach into the future with our state-of-the-art multimedia system, which now comes with a larger and more user-friendly display screen. Enjoy advanced connectivity by syncing your mobile device to your vehicle through the Apple CarPlay and Android Auto. This modern system allows you to make calls, access your navigation system, and control media playback – all while using the voice command feature.

Unleash new possibilities with the redesigned Lexus RX 350L 7-seater. When you need additional space, unfold a third row of seats at the touch of a button. With an outstanding overall length of 5 000mm, there's no need to leave anyone behind.

The first two rows of seats are made of Semi-Aniline Leather, which can be heated, according to your preference. The front row of seats has been meticulously crafted to offer excellent lumbar support for increased comfort. The memory system embedded in the driver's seat ensures personalised bolstering and ease, even during long drives. You've worked hard to afford world-class comfort. Get a vehicle that offers you first-class luxury.

REIMAGINE REALITY

Can your car scan its surroundings for optimum safety? We've reimagined what it means to illuminate the road and its surroundings with the world's first BladeScan™ Adaptive High-Beam* System. These precise beams only highlight what you need to see while you drive, offering faster pedestrian and road sign recognition, for increased assurance and stress-free driving.

Enhancing the headlamp performance was a challenging task. We developed the advanced BladeScan™ technology over a period of 13 years, doing thousands of tests and tapping into Lexus' relentless spirit of innovation. The result is greater confidence when you get behind the wheel of the new RX, even during night drives.

This advanced technology offers incredible illumination without restricting your visibility, which amplifies your connectivity to the car, road and environment. The revamped RX models have been pioneered for complete peace of mind and advanced safety. Finally, a car that takes the lead, just like you do.

Model Shown RX 450h SE.

*Available on RX 450h SE only.

South African vehicle specifications may differ.

BLIND SPOT MONITOR

Inconspicuous rear-mounted radar detectors are installed in the side mirrors. An alert goes off when an object moves into your blind spot. This offers increased focus and concentration from the front of your car, while Rear Cross Traffic Alert reduces accidents by identifying vehicles that approach from behind you.

LANE TRACE ASSIST*

If you deviate from the lane you are driving in, the Lane Trace Assist with integrated Lane Keep Assist and Steering Vibration will alert you with a vibration in the steering wheel or the sound of a buzzer to encourage more precise driving.

RECONCEPTUALISE SAFETY

Can safety be an intrinsic part of a car's performance? We rethought what it meant to be protected while driving, by integrating innovative technology that is specifically designed to keep you and your passengers safe.

Lexus Safety System+* is an integrated suite of advanced safety systems designed to help in certain circumstances, from alerting you to pedestrians, to helping you maintain a preset speed and following distance from the vehicle ahead. The second-generation Lexus Safety System+ uses a single lens camera and millimetre-wave radar to predict and prevent accidents. The All-Speed* Cruise Control available in the Lexus RX 450h mimics the speed of the car in front of you for instinctive driving with a reduced chance of collisions.

The intuitive navigation system has evolved to include human-machine interface with touchscreen display, which offers increased connectivity on demand. The touchscreen makes it easy for you to set your driving preferences under any circumstance without disrupting your driving or shifting your eyes from the direction of the road. The Lexus RX is a car that understands your instinct to protect the people that matter most to you.

PARK DISTANCE CONTROL

The Park Distance Control is combined with the cutting-edge Clearance Sonar indicator, which intuitively displays the exact position of an object in relation to the car for optimum perceptiveness. It also includes Rear Cross Traffic Alert, a feature that works together with Lexus radar apparatus to detect the presence of vehicles in adjacent lanes and a warning is emitted if a vehicle enters the driver's blind spot.

PRE-CRASH SYSTEM*

The innovative Pre-Crash System is composed of sensors that detect pedestrians and other vehicles, making it easier to avoid collisions. It also amplifies the brake force when the driver decelerates suddenly, for increased safekeeping.

*Available on RX 450h SE and F SPORT models only.

REDEFINE PERFORMANCE

Is there an equilibrium between cutting-edge performance and unparalleled comfort? We've challenged the driving dynamics of traditional SUVs to give you a more responsive driving experience, with uncompromised ease and support.

Discover complete driving pleasure in the new Lexus RX, with increased suspension rigidity for more agile handling and riding comfort. The hub bearings have been tightened and tuned for enhanced responsiveness, reducing understeer and rolling, and providing the driver with a greater sense of cohesion with the car. The incredible smoothness is even more tangible during take-off and while changing lanes.

Along with revised suspension bearings, a Friction Control Device has been added to the shock absorbers for optimal steering control. The exquisite driving feel has been thoroughly refined and trialled on test courses and roads alike to ensure that each vehicle steadfastly pushes progress to the limits in classic Lexus fashion. The new Lexus RX is a car that works as hard as you do to reach new pinnacles of performance.

RX 450h

The Lexus Hybrid Drive with the Atkinson-cycle V6 engine and a CVT transmission exceeds expectations by balancing innovation and design with class-leading fuel economy, environmental efficiency and evolved driving performance. The innovative self-charging systems charge up every time you push the brake pedal down.

RX 350

The Lexus RX petrol models are powered by a 3.5-litre V6 engine with an 8-speed automatic transmission, delivering a maximum of 221kW of power at 6 300 r/min on the 5-seater, and 216kW on the 7-seater model.

RETHINK EXHILARATION

Does your car exhibit power beyond appearance? We've challenged the capabilities of an ordinary SUV to unleash the powerful Lexus RX range. Each car's exterior is shaped for increased agility and optimum performance.

The pure driving pleasure of these models offer robust strength, reduced noise and vibration as well as bump suppression. Finally, an SUV that takes speed and efficiency as seriously as you do.

REFASHION THE FUTURE

Does your hybrid have the power to charge itself? We redefined the perception of what a hybrid is meant to be by integrating an innovative self-charging system that doesn't require a single plug.

The Lexus RX 450h balances conservation, performance and style. With advanced hybrid technology, the RX 450h delivers enhanced fuel efficiency and clean emissions without compromising on power. The petrol engine and motor coexist to offer increased performance during acceleration and high-speed driving.

Lexus has dictated the future of hybrids for 13 years, when the world's first luxury self-charging hybrid was invented. That was just the first step to pushing the boundaries of what a petrol-electric car can be.

The Lexus RX 450h showcases the next level of hybrid performance. With 230kW of total system output, the RX 450h has made greater strides forward. Lexus Self-Charging Hybrids are eco-friendly and produce zero emissions when in Electric Vehicle mode.

Featuring a 3.5-litre Atkinson-cycle V6 with Lexus Hybrid Drive, which emits only 131 grams of CO₂ per kilometre, the RX 450h is just as unconventionally conscious as you are.

REWRITE THE RULES

Is your SUV just sporty or does it focus on speed and exhilaration too? We've broken the rules of a traditional SUV by accentuating the aggressive look and feel in the new Lexus RX F SPORT. This is a completely new addition to the range, born out of a passion for increased performance.

The car is a mature yet playful all-wheel drive, and has remarkable stability. The rounded surfaces offer incredible elegance and agility. With an exceptional V6 3.5-litre engine, paired with a powerful automatic 8-speed transmission and outstanding horsepower, it's the ideal SUV to take on any road, whether it's a winding mountain path or a compact city street. You don't play by the rules, get a car that doesn't either.

Enjoy the exhilarating experience that is the Lexus RX F SPORT. Recognised by its one-of-a-kind mesh spindle grille, robust brake pads and intuitive leather steering wheel, it is both sporty and sophisticated. When you see the iconic F SPORT emblem, you know you're driving a car that's crafted with excitement in mind.

EXCEED EXPECTATIONS

EXTERIOR FEATURES

How can a car anticipate the future while meeting your current needs? We've tirelessly undertaken new challenges over the course of 21 years to make sure that the Lexus RX fits into your fast-paced lifestyle. The fourth-generation Lexus RX is still the benchmark in the market, featuring a captivating exterior composed of smooth curves. The intelligent all-wheel drive system, which monitors road conditions in real time and automatically shifts the engine between axles, improves the overall efficiency of the car. You don't let people's perceptions define you. Drive a car that has the same attitude.

20" ALLOY WHEELS DESIGN

The elegant alloy wheel design demonstrates superb craftsmanship. True to Lexus' attention to detail, the pattern of the alloy wheels follows precise and meticulous measurements, further enhancing the vehicle's agility and handling on the road.

AUTO HIGH-BEAM HEADLAMPS*

An Automatic High-Beam system with updated headlights that are narrower for ultimate sophistication. The revolutionary Adaptive Head-Beam System** is integrated into the LED projector unit for increased functionality and safety.

UPDATED REAR COMBINATION LAMPS

Light clusters run laterally across the RX's body, accentuating the width of the car and establishing greater unity. When braking heavily, the active brake lights pulse rapidly to provide an effective warning to following vehicles.

UNIQUE MESH SPINDLE GRILLE

The Lexus RX has received a facelift with the spindle grille, composed of simple "L" shapes that make up a complex three-dimensional maze that captivates the eye. It was meticulously drawn and redrawn over a thousand times. This grille exudes elegance and confidence from every angle.

SIDE MIRRORS

The heated door mirrors with auto-retractable memory function can be folded in electrically to help negotiate narrow spaces and, with an integrated Blind Spot Monitor they ensure less risk of damage. Electrochromatic technology also dims the mirrors to prevent the risk of being dazzled by following traffic.

GLASS MOONROOF

The electric, tilt-and-slide glass moonroof lets in the desired amount of moonlight (and sunlight) as well as air into the cabin. The one-touch control is quick and convenient, while a manual sunblind provides shade as desired.

*Available on RX 450h SE and F SPORT models only.

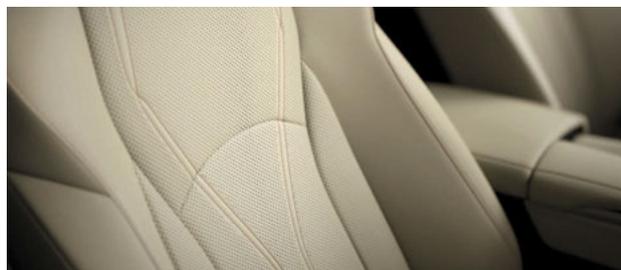

**Available on RX 450h SE only.

Images shown for illustrative purposes.

SURPASS THE STANDARD

INTERIOR FEATURES

How can you stay in tune without getting distracted? We challenged connectivity in the new Lexus RX with a top-of-the-range multimedia system, which features touchscreen capabilities to give you a stress-free, seamless driving experience. The spacious Lexus RX interior offers enough room for the driver to concentrate without any obstructions. Typically, an SUV would either focus on generous cabin space or style, but the revamped RX combines both elements, ensuring complete fulfilment. Finally, a car that feels like an extension of yourself.

ADJUSTABLE AND HEATED SEATS

The driver's seat in the RX remembers your ideal driving position for increased comfort. The front seats are electrically adjustable. You can alter the heat or the cooling of the front and rear seats according to your comfort levels.

UPDATED MULTIMEDIA SYSTEM

The multimedia system has been upgraded, offering enhanced usability and readability. The adaptive touch display allows for some buttons in the display to be operated by direct touch. Following the adaption of the touch display, the display position has been moved closer to the occupants, enhancing the operability.

PANORAMIC VIEW MONITOR* (PVM)

The Panoramic View Monitor displays a composite image (like a bird's eye view), which combines images from cameras mounted on the front, sides and rear of the vehicle, assisting the driver to check the area around the vehicle.

UPGRADED CENTRE CONSOLE

Take charge with the updated centre console. The Electro Multi-Vision Screen, which displays navigation in full colour, enables you to perform several functions using the incredibly intuitive remote touch function. Whether you're setting the audio levels or monitoring the climate conditions, you can customise your driving experience to suit your unique needs.

MYLEXUS

Experience complete connectivity with the MyLexus system. It's a non-evasive device which offers in-car Wi-Fi access, notifications, roadside assist and logbook monitoring. It links to your Lexus profile so that you can book services, check your finance and look through Lexus showrooms.

REAR SEATS

The second row of seats on the new RX 350L can be manually split 60:40, allowing passengers to walk in and lounge comfortably into the third row of rear seats, which also neatly fold away electronically.

*Available on RX 450h SE and F SPORT models only. Images shown for illustrative purposes.

EXPERIENCE ULTIMATE CONNECTIVITY WITH **MYLEXUS**

All Lexus vehicles can now be connected to the MyLexus App on your mobile phone, giving you more control of your driving experience and opening up a whole new world of personalised offerings and customisable features so that you can:

IN-CAR Wi-Fi*

Connect to Wi-Fi

GPS LOCATOR

Always know your vehicle's GPS location

LOGBOOK

Have access to a digital logbook

DRIVER NOTIFICATIONS

Important reminders like licence renewal

BATTERY HEALTH CHECK

Check your battery health

SERVICE BOOKING

Manage your services

ROADSIDE ASSISTANCE

Get real-time roadside assistance

DRIVER RATING

Receive a driver rating

FLEET MANAGEMENT

Monitor your fleet

LICENCE RENEWAL

Car licence renewal available

AND MORE

The above features are not all; there are loads of other features available to further enhance driver and guest safety, convenience and comfort, and plenty more to come to make your driving experience better and better with every kilometre.

**DOWNLOAD THE MYLEXUS APP
AND GET CONNECTED TODAY**

FIND OUT MORE AT [LEXUS.CO.ZA/MYLEXUS](https://www.lexus.co.za/mylexus)

*15GB Free data once-off upon activation. Ts&Cs apply. Available in South Africa only.

LEXUS MAINTENANCE

INTRODUCTION

At Lexus, we take pride in the advanced engineering and craftsmanship of the vehicles we build. For that reason, our Warranty and Distance Plans are designed to provide Lexus owners with seamless vehicle maintenance and complete peace of mind. The Lexus Warranty and Distance Plans both enjoy full support by Lexus SA and offer customers access to specialised servicing, maintenance and repair at any Lexus dealer in South Africa, Namibia and Botswana.

WARRANTY AND DISTANCE PLANS

To complement its comprehensive Warranty, the RX features a Distance Plan Complete that provides for service and maintenance costs. The option to extend the period of cover is available for both the Warranty and Distance Plan Complete. These options can be discussed with your Lexus dealer. To familiarise yourself with the cover provided by Warranty and Distance Plan on the RX, please consider the information below.

WARRANTY

- Duration: 7 Years or 105 000km from original date of sale.
- Cover: Repair or replacement of components that fail or malfunction as a result of manufacturing or material defect.

DISTANCE PLAN

For the Lexus RX, all Distance Plans have been improved. All Lexus RX models are covered by a Distance Plan Complete full Maintenance Plan for 7 Years/105 000km as well as a comprehensive manufacturer's Warranty, the RX 450h SE has a Hybrid Battery Warranty of 8 Years/195 000km.

Consult with your Lexus dealer for more information on the terms and conditions of the Warranty and Distance Plan Complete offered on the RX.
